## Pack de sims

Rois-Mod\_sgmods. Roi 18 Wos Haulin - mod - Galtrap. Been a long time since i last watched a GTA game that wasnt a shitty port from pc to a console. 2 hours later and im back with some time to kill in gta sa once again. Oh fuck when im gonna complete all the achievements i simply cba to play it. The creator of this game has said that the next game will not have any censorship. i know this is coming off as arrogant but it just shows the progress that they have made that they even have this in mind, hopefully the next game is up and running already rather than another 2 years, HDRamble A-Rock, Rodeo Carver A-Rock LMP. Note Elansa. This is the reason why the next game will never be coming. The game has said they are going to focus on other games and they will not be doing there own sandbox game again. So yeah if you dont like R\* there games play EA games or atleast other developers that dont fall under there notoriousness. Im trying to get into the game there new car but i dont wanna use any cheats or exploits its so lame to be honest especially for the GTA series, and yea im actually gonna try and buy it and play it its just how pissed off im to play this mediocre game. With all the other GTA games i only have R\* in the back of my mind i wouldnt be playing that game if it wasnt from R\* i would probably be playing GoW if it wasnt for Rockstar games. The only reason they are making this is because they see the success of other ports and other games with the new consoles. And oh yes they are very important. That is the reason why i will not be buying this game. And im more angry at their policies and what they are doing. There are alot of better GTA games to play now a days that dont have or have are not a let down. So yeah thats how i feel about GTA SA. How about you? Subscribe to our Newsletter! Whats Up? And welcome to my channel you like GTA V, other GTA games, Los Santos and San Fiero, I do. I love WOW and GTA V. I also like Skyrim and Minecraft. And i love to have fun in games.
