What's New in the File Robot?

File Robot is a handy and reliable application designed to automate tasks such as file compression, sorting and filtering. File Robot also allows you to rename, copy / move and delete files in batch mode. You can also use it to create photo albums. UPDATED: 10.09.2011 Xavi Artileheiro added a comment - 22/Sep/11 07:22 AM Thanks for the app description. file.io added a comment - 23/Nov/11 02:40 AM This is a wonderful app and deserves a 5 star rating. My only suggestion is that the instructions mention that it is not for PHP developers. I think the following are sufficient instructions: Open File Robot in a web browser and choose the destination folder you want to upload the files. Type or paste your regular

expressions into the search box (one after the other). Select the folder you want to upload the files to and press the start button to start the process. Thanks! Jason Miller added a comment - 23/Nov/11 08:55 AM file.io is a great app, and this is a wonderful app and deserves a 5 star rating. My only suggestion is that the instructions mention that it is not for PHP developers. I think the following are sufficient instructions: Open File Robot in a web browser and choose the destination folder you want to upload the files. Type or paste your regular expressions into the search box (one after the other). Select the folder you want to upload the files to and press the start button to start the process. Thanks! Dmitry Bogatirev added a comment - 03/Dec/11 02:09 AM i have tried file robot i cant find "add new folder" in panel "new folder" (i try to add new folder and i dont find it anywhere i check new.php from 6.1 but it dosent have it where is it? joncat added a comment - 17/Dec/11 10:08 AM The "new folder" section is in the "edit" tab. You can add new files there, or folders. I had to change my code a bit to actually start doing work with File Robot, but it seems to work fine now. Lior Shnitzel added a comment - 18/Dec/11 03:51 AM Dear developers, I've downloaded and installed the latest version of File Robot for PHP (but there's some troubles. When I choose a folder to upload to and fill the boxes of the wizard, the application crashes, displaying the next dialog: File Robot couldn't

System Requirements:
