This new standard eventually became the basis for a new version of AutoCAD. This new version of AutoCAD for Windows was called AutoCAD 2000. While users could still use the previous version of AutoCAD if they wanted, AutoCAD 2000 was the only version of AutoCAD available for download. As its popularity continued to grow, AutoCAD became more sophisticated. By the end of the 1990s, the software was able to support a variety of graphics. AutoCAD also included a Web browser, in order to make it easier for users to access AutoCAD from the Internet. In response to the growing popularity of AutoCAD, Autodesk launched a series of upgrades in the early 2000s. This new version of AutoCAD was called AutoCAD 2002.
