Website Information: Click & Download Book here EDIT I tried placing Tratado de histologia gartner 4 free Download epub in to the desktop (not the downloads folder), this does not work. A: HTML We can download the book from its official website: and it turns out it's just plain HTML code. So, I don't see why you are failing to download it. However, since you only want the epub version, you can run the following code in Python: import urllib import re def download(source, dest): if not os.path.isfile(dest): os.makedirs(dest) with open(source, 'r') as f: data = f.read() with urllib.request.urlretrieve(source, dest) as url: re.search("http", url).group() Of course, if you want to do this manually, just run the following command: wget To open the downloaded file, you can use EBook Reader. You can use Nautilus to open it in Nautilus, but you won't be able to see the fonts correctly. I suggest using BookMark+. It also integrates with a lot of Ubuntu applications, which might make your life easier. Once you download and open the book, you can use the Librarian to move around. If you want to see the fonts yourself, you can use a dedicated font viewer: Font.families.make("Times") /* * Copyright (C) 2007 Apple Inc.
