I will not be able to help you, and saying that I do not have any idea of what you need exactly, or where you might find anything, will be a useless answer to your question. Solution I checked, and it seems that Autodesk programs can be run in Wine, and I don't think it is hard to install Windows fonts in a Wine virtual machine. I don't think you need to run Windows inside Wine unless you really want to, of course. All in all, I don't think you need to be able to run Photoshop, and even Adobe Illustrator works fine with Wine (I use it) and with Cygwin (a Unix port). A: Ok, I downloaded it and I had it running in the VM. I could open the cache folder, and I could open the fonts folder. Now I am going to give it a try. Activity of fluoroquinolone and other antibiotics against clinical isolates of diarrheal pathogens. The activity of fluoroquinolones, ampicillin, chloramphenicol, cotrimoxazole and tetracycline were tested against 866 clinical isolates of enteropathogens, including 150 nontyphoidal salmonellae, 216 salmonellae and 624 E. coli. Fluoroquinolones inhibited 75% of salmonellae and 89% of E. coli. Tetracycline inhibited 83% of E. coli and 65% of salmonellae. All E. coli isolates were inhibited by two-thirds of the ampicillin concentrations, but sensitivity to ampicillin ranged from 44% in yersiniae and 73% in shigellae to 94% in salmonellae. Tetracycline inhibited over 85% of all enterobacteria, including E. coli, Klebsiella, Proteus, shigella and salmonella. Chloramphenicol was particularly active against E. coli (resistance rate, 5%). The oral therapeutic doses of fluoroquinolones were adequate to treat enteropathogens./* * This file is part of the Chelsio FCoE driver for Linux. * * Copyright (c) 2008-2012 Chelsio Communications, Inc.
