PlexLive features an HTML5 user interface that supports ios, android and other platforms. It provides support for streaming and transcoding. It is designed to stream 4K and 360 videos (in HEVC format) and the 5.1 Dolby Surround Sound track. PlexLive v1.0.1 supports both legacy and new devices. PlexLive v1.0.1 can be used on servers that have up to 10 devices connected at one time. PlexLive is intended for home use and can be used to stream on Plex.tv using your Plex libraries. PlexLive is designed to help people create their own video databases with thousands of movies (files).

The software is free, easy to use, and has no restrictions on CPU or RAM. PlexLive can be accessed from anywhere in the world. No need for a WiFi router, PlexLive works with any wired LAN connection. If you are interested in PlexLive please visit the Plex website: The Plex website offers free accounts for streaming, managing, and downloading videos. A Plex account is necessary to access certain functions. You can easily install Plex on a smart phone, tablet, or computer. Additional Plex servers can be set up on your personal computer or server. Plex allows you to manage your videos by categories and to access the entire content stored on your device b7e8fdf5c8

1) Setup Wizard Proxy changer is based on a wizard interface, which allows you to change proxy easily and quickly without any knowledge in coding. 2) Add proxy object, such as: *.google.com, *.yahoo.com, etc. 3) Configure the proxy type, to set different types of proxy for different application, such as IE and Firefox. 4) Configure the proxy PAC file such as: *.google.com.pac and *.google.com, *.yahoo.com.pac and *.yahoo.com, etc. 5) After setup, you can always get the current proxy settings and set the automatic configuration through a proxy PAC file. 6) Auto update the proxy settings such as: IE setting and Firefox settings. Proxy changer's interface and Features Proxy changer allows you to configure any of the following: 1. Proxy type - you can change the default proxy settings for IE and Firefox individually. 2. Proxy URL - you can configure the same proxy settings for IE and Firefox. 3. PAC file - Proxy changer can configure the automatic configuration through a PAC file, that means you will not need to set the proxy settings manually. 4. PAC file URL - Proxy changer can also configure automatic configuration through a PAC file on the URL. 5. Proxy file - Proxy changer can also configure the automatic configuration through a Proxy file. Proxy changer is not necessary to be installed. It will automatically download the file during its operation. Usage: 1. Select the Proxy changer program in the start menu. 2. Select the New Proxy Settings from the File menu. 3. You will be prompted for the proxy type. You can add any proxy servers you want, such as *.google.com, *.yahoo.com, etc. 4. Add a new proxy PAC file by clicking Add and configure the automatic proxy. 5. Select the proxy server and click OK. 6. You can select the auto configuration for IE or Firefox. 7. Select the Proxy Settings in the File menu. 8. Click OK to apply the settings. 9. You can now choose the file and click OK to save the settings. 10. Select the Refresh Settings in the File menu to update the proxy settings. 11. Save Settings in the File menu. Win - Fire it up and look at the wizard. Click New Proxy Settings. Choose PROXYFILE
