Combat Strategy: Attack your enemy first. Attacking the enemy is your main priority, but to attack and get hit yourself is not important. As you get hit, your health drops. If the health drops to zero, you die. The weapons and armor you get also help you to deal with the enemies. You can find out three kinds of weapons and armor. They are each different in uses and at the same time very useful. Here is the property of each. The first is attack: It is the most essential weapon of the combat. You can attack by yourself with this weapon and at the same time defending yourself. There is a difference between the enemy attack and yours. There are times that an attack can be turned into a defense. When that happens you can attack your enemy with the same weapon again. However, the enemy will not get hit if they turn their attack to yours. You can make use of this weapon to deal a fatal blow to your enemies. The second is the shield: A shield blocks the attacks of your enemy. When you are attacked by the enemy, you can turn your attack to shield's attack. This weapon is also very effective to defend yourself. The shield's attack and yours are different. You can attack with shield with some skills. The third is a long sword: The long sword is the longest weapon in this game. It is a combination of the shield and the sword. The long sword also has two different attacks. You can attack with the sword or shield by turning its attack to yours. Even more, you can use skills to enhance the abilities of your sword. For example, you can make it to go into your attack in rapid succession, to deal more damage. Advanced Weapon: With the powerful sword, you can make use of the attack of the long sword with the sword and also the shield. The skills you make use of depend on the weapon you use. Don't Miss: Just a few years back, saying you had a preference between Starbucks, McDonald's and Burger King would have been considered cranky. These days, being a "Big Three" girl is basically your default option. While McDonald's, Starbucks and Burger King have become perceived by consumers as ubiquitous entities that do all things (delivery, coffee, burger bars, etc.), this is not the case with the P

games. It's why I run around with my headset on, with my sleeves rolled up and a sweatband on my eyes so I can't see too much outside of what's happening on the monitor. It's why my veins and capillaries are all a mess and I'm shaking all the time. It's why my mood completely depends on the game. Because it's me, looking back at you. There were so many great moments, and so many hidden, great moments. Moments when you hit that wonderful crescendo of pure jumping joy, but I know I played this game so well because of moments like these where I may not have properly planned my death, and had to quickly think "WHAT DO I DO HUH?". I love them. Even a simple monitor share for the GameSpot review is a wonderful thing to hold on to. Seeing my own hands as they stuck my game in for the first time, my jaw dropping as I realise the shapes on screen are real and we're not trapped in some weird world. You can probably tell that I love this game. I was sat here waiting for the Risk of Rain soundtrack review, which I would have published exactly a week ago. With only seven days to go, I don't think I can wait any longer. I also can't lie to you all, I am terrified. Risk of Rain is precisely how it sounds. It's a small, strange title, playing with mechanics and probabilities. It's so beautiful and wonderful, but equally dangerous and fraught with death. Careful, reader, this little mouse will not sniff for signs of 'clickbait'. After seeing the series take off, and a whole heap of fantastic games come out, I couldn't be happier with the soundtrack. Take a look through my list and you'll see it. Listening to the soundtrack over and over this week, and hearing the music as I played through, made the delay perfectly acceptable. Now, I'm often wrong about, well, everything. But I feel fairly confident that "beautiful" and "music" will go together. Follow me on Twitter and Facebook and we'll get it right.
