The proposed studies examine the effects of the putative dopamine (DA) agonist SKF 38393 (SKF) on outcome expectancy for food and money in rats. DA systems have

been implicated in encoding and responding to incentive information in the context of food and money. The proposed studies examine the effects of SKF on outcome expectancy to food and money under different reinforcement conditions. Specifically, these studies examine the role of the nucleus

accumbens (NAc) in food-related outcome expectancy, and the role of the nucleus caudatus-putamen (NCP) in money-related outcome expectancy. A combination of behavioral tests (reinforcement-related responding for food and money), in situ hybridization and receptor autoradiography will be ca3bfb1094

Using Autocad =====
=====

=====

= Autocad's great features allow you to design the most complex mechanical drawings. It works fast and it's light. But Autocad has a few limitations that could hinder your productivity: - You have to use Windows (sorry for Mac users). -

You can't use external mice or keyboards (especially on computers). - You can't see the mouse cursor in the top-right corner of the screen. - You can't see the keys of your keyboard. Your Autocad experience is spoiled if you use an external keyboard or a mouse. Here's a great trick: - Use Autocad with an external keyboard and a customized shortcut.
