If you have any trouble downloading torrent, please check your internet connection..Q: Mocked/Fake Member Function Having Multiple Returns When using xunit to unit test a class that defines functions that are intended to return a double, I can assign a double to a double-returning method to get a test value, such as: public class Tests { [Fact] public void TestDouble() { // Arrange MyClass myClass = new MyClass(); var function = myClass.GetFunction(); // Act double ret = function.Invoke(1); // Assert Assert.Equal(1.0, ret); } } public class MyClass { public double GetFunction(int parameter) { return Math.Pow(parameter, 2); } } In my mind, this seems to be the canonical way to test this. However, in reality I have a method that returns an object with a property that is a double: public class Tests { [Fact] public void TestDouble() { // Arrange MyClass myClass = new MyClass(); var function = myClass.GetFunction(); // Act double ret = function.Invoke(1); // Assert Assert.Equal(1.0, ret); } }
