Connectify Hotspot Pro Fix is a free app that comes with the full version of Connectify Hotspot pro. This edition fixes the problem of hard-to-explain errors when starting the program. You can also change and edit a few settings in this edition. The software can be used to alter any internet connection to a hotspot. It can start up a hotspot, use it, reboot it and shut it down. When you are done, you simply quit the app and all connections will be automatically shutdown. No matter whether your area name is dynamic or static, Connectify hotspot is able to maintain your area to make sure that the exact same name is saved. It also supports Wi-Fi Max router variants, and hotspot PRO. Connectify Hotspot is set up to create an area, for your network, assigning the machine a unique IP address and DNS address. Hotspot Pro can allow you to add and adjust your access points. It could be set up to work in either sequential, or simultaneous hotspot PRO. You could have more than one area, but it will be displayed in a list list. Connectify hotspot supports QR codes, html links, and more. What's more, Connectify Hotspot also enables you to set how many devices can be linked together, as well

as the maximum speed, various settings like support for the auto on/off function, and the list of access points. Connectify Hotspot also provides a password. An optional password is used for enabling the usage of the auto on/off function and other features like anti-virus, malware, and firewall. A router-PRO can be an essential part of Connectify Hotspot. This offers you the capability to talk to lots of devices with the ability to automatically establish the most secure network connection wherever you are located in the home.
